

Description

VGA Splitter

MODEL : VP02

VGA EXTEND 65m 250MHz High Performance

2-Port VGA Splitter/Extender 65m

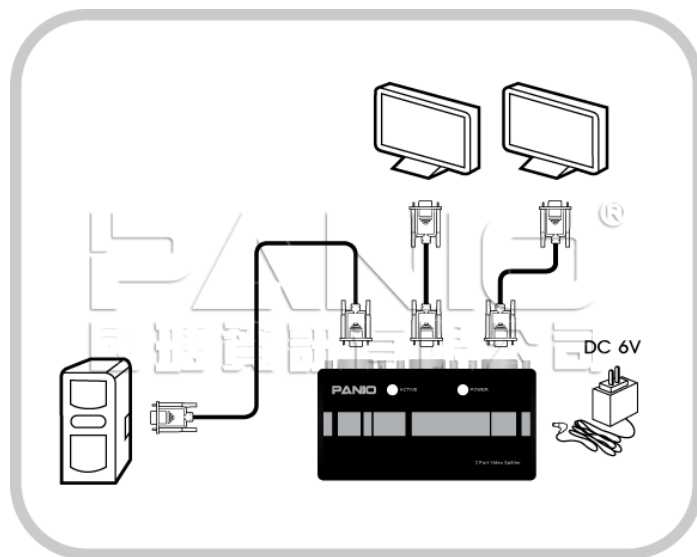

Made in Taiwan

The VP02 Video Separators (Splitter) are boosting devices which duplicate the video signal from one source to 2 outputs at 250 MHz; ideal for any monitor using analog signals. Additionally, they both extend the transmission distance to 210 feet, making them an excellent tool for public broadcast systems.

Features

Diagram

- One video input to 2 video outputs.
- Supports up to 250 MHz bandwidth.
- High video resolution - 1920 x 1440.
- DDC, DDC2, DDC2B Compatible (Port 1 only).
- Cascadable to 3 levels.
