

Description

VGA Splitter

MODEL : VP152

2-Port VGA Splitter/Extender 65m

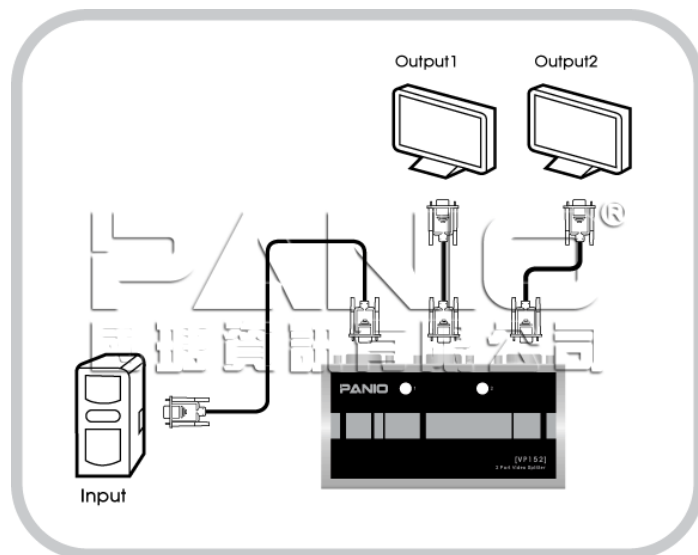

Made in Taiwan

The VP152 Video Separators (Splitter) are boosting devices which duplicate the video signal from one source to 2 outputs at 450 MHz; ideal for any monitor using analog signals. Additionally, they both extend the transmission distance to 210 feet, making them an excellent tool for public broadcast systems.

Features

- One video input to 2 video outputs.
- Supports up to 450 MHz bandwidth.
- High video resolution - 2048 x 1536.
- DDC, DDC2, DDC2B Compatible (Port 1 only).
- Cascadable to 3 levels.
- Long distance transmission - up to 65m (210').
- Supports VGA, SVGA, XGA monitors.
- Made in Taiwan.
